Observation:

1. When a special character is added at the end or middle of the password it becomes strong
2. The use of famous personalities names as a password will result in a weak password which is easily crackable.
3. Password with more than three words are strong.
4. The use of countries name of famous new papers name as a password is not suitable.
5. As a result, the use of any person name, place or thing as a password is not a great idea.
6. Password with random alphabets are ideal. If there's only 10 to 15 random alphabet, it'll be a strong password.
7. Password with random numeric values also are great passwords. If we have only 10 to 15 random values, it'll be a strong password.
